FRESH - USA MOREL MUSHROOMS

Preparation & Care

Keep Cool, Leave Bag Open during transport, then Remove from Bag ASAP

Cut the mushroom in half lengthwise to make it as flat as you can.

Soak the mushrooms in salt water for about an hour and turn them.

Rinse off mushrooms under a small stream of water from your faucet.

Gently Blot them dry with a paper towel.

Place the mushroom in a colander or strainer to further drain.

Place a dampened cloth or dry paper towel over the top of the colander or strainer, and a plate underneath, then refrigerate.

They should keep for 7 to 10 days. (If You allow them to sit that long!)
